Welcome to the CoreCHI™ Examination

Exam Structure

This exam contains 100 questions, presented in random order. You will have 120 minutes to answer all questions within this exam. The examination you are about to take is comprised of 100 multiple-choice questions, with four options of possible answers for each question. You will answer one question at a time. There are, however, a couple of special scenarios in the test. For each scenario, you will read one passage of text, that will be presented on the left side of your screen, describing a specific situation and answer five (5) questions based on the same situation.

Your task is to select the best choice for each question, the choice that you believe to be the most acceptable of the options offered. You are to select one and only one option to each question. The option you select for each question will be scored “correct” or “incorrect” on the basis of the standard answer, which has been determined to be most acceptable in accordance with the professional standards. Any unanswered question is counted as “incorrect.” Your score will be based on the number of questions scored “correct.”

You need to achieve a score of 450 (on a scale of 300-600) to pass the examination. If you fail the examination, you may retake it in 90 days.

If you have not submitted your examination when time has elapsed, your examination will be closed automatically and scored as if you submitted your examination. You will not receive any additional time to complete the examination.

If you have any computer-related issues during the exam, please inform the proctor immediately.

If you believe any question on the examination was faulty in any way, or if you believe there was an issue that affected your performance during the examination, you must send an email within five days of taking your exam to info@cchicertification.org. All communication with CCHI about the testing experience must be in writing.

Before you begin, it is strongly encouraged that you take a few minutes attempting any exam questions. The tutorial provides an overview of the questions during the examination.
Step 1 – Read the Introduction

These are the Introduction pages. The label “Section” means the 10-15 minutes allocated for you to read the Introduction. You can click through all pages to learn about the test controls. This time does not count towards the 2-hour exam time.

When you are ready to start the actual test, click the “Start the Test” button at the bottom right.
Step 2: CoreCHI™ Exam itself = Section 1

The label “Section 1” means all 100 questions in the actual exam. The actual exam is timed to last 2 hours.
After you click “Start the Test,” the label “Section Time” means the actual exam time which is 2 hours.

If you click the “Finish Section” button, you will be finishing/submitting the whole exam. DON’T DO IT UNTIL the “Progress” bar shows 100% and you answered all 100 questions. After the exam section is finished, there is the last “Section” which contains 4 survey questions about your testing experience.
Finish the Exam

You completed everything when the "Progress" bar shows 100%.

Then you can "Finish Section" (=the exam).
Step 3: Survey and Submit the Exam

At the *Survey Section*, you will see the “Finish test” button and click it to submit the exam for scoring.
Submit the Exam

Confirm by clicking “Finish.”
Exam Results: Pass/Fail

You have completed this test. Unfortunately, on this occasion, you have not passed. Please speak to your teacher for further information.

Test Result
Grade: Fail
Happy Testing!
